

THE BASICS OF RANSOMWARE

WHAT IS RANSOMWARE?

- Malware that **encrypts data** on systems to lock you out
- Threat actors demand a ransom to “**decrypt**” the systems

EXTORTION

- Systems encrypted OR data stolen and **demand of ransom** to resolve

DOUBLE EXTORTION

- Threat actor steals data **and** encrypts systems

TRIPLE EXTORTION

- Stolen data
- Encrypts systems
- **Intimidating** third parties
